

# Datasheet for ‘analysis\_data\_above40’ and ‘analysis\_data\_below40’\*

Thu Dong

April 20, 2024

Datasheet for ‘analysis\_data\_above40’ and ‘analysis\_data\_below40’, looking into the motivation, collection process, preprocessing/cleaning/labelling, distribution, and maintenance of it

## Motivation

1. *For what purpose was the dataset created? Was there a specific task in mind? Was there a specific gap that needed to be filled? Please provide a description.*
  - The dataset was created to enable an analysis of the top mortality causes in Switzerland in young adults and middle-aged adults using the data that is provided in the WHO Mortality database. We were unable to find a way to a data set that has already separated the age groups, young adults and middle-aged adults.
2. *Who created the dataset (for example, which team, research group) and on behalf of which entity (for example, company, institution, organization)?*
  - The dataset for analysis was created by Thu Dong
3. *Who funded the creation of the dataset? If there is an associated grant, please provide the name of the grantor and the grant name and number. No funds were needed nor granted for the dataset that was used for the analysis.*
4. *Any other comments?*
  - NA

## Composition

---

\*Code and data are available at: <https://github.com/thu2912/Top-mortality-causes-of-age-groups-in-Switzerland.git>.

1. *What do the instances that comprise the dataset represent (for example, documents, photos, people, countries)? Are there multiple types of instances (for example, movies, users, and ratings; people and interactions between them; nodes and edges)? Please provide a description.*
  - A row in the dataset refers to a cause of death in a specific year for a specific age group
2. *How many instances are there in total (of each type, if appropriate)?*
  - There were 30 instances in each dataset and there were 2 different datasets.
3. *Does the dataset contain all possible instances or is it a sample (not necessarily random) of instances from a larger set? If the dataset is a sample, then what is the larger set? Is the sample representative of the larger set (for example, geographic coverage)? If so, please describe how this representativeness was validated/verified. If it is not representative of the larger set, please describe why not (for example, to cover a more diverse range of instances, because instances were withheld or unavailable).*
  - It is a smaller sample from the big WHO Mortality database. The larger dataset all causes of death in 120 countries. The data sets contain only the top 10 number of deaths per age group for the years 2010, 2015, and 2019.
4. *What data does each instance consist of? “Raw” data (for example, unprocessed text or images) or features? In either case, please provide a description.*
  - It consists of an integer value of the annual number of deaths of each corresponding cause, population, death rate, and age.
5. *Is there a label or target associated with each instance? If so, please provide a description.*

yes. It is unique causes in unique years
6. *Is any information missing from individual instances? If so, please provide a description, explaining why this information is missing (for example, because it was unavailable). This does not include intentionally removed information but might include, for example, redacted text.*
  - No there is no information missing.
7. *Are relationships between individual instances made explicit (for example, users’ movie ratings, and social network links)? If so, please describe how these relationships are made explicit.*
  - Yes, unique causes in the year
8. *Are there recommended data splits (for example, training, development/validation, testing)? If so, please provide a description of these splits, explaining the rationale behind them.*
  - No

9. *Are there any errors, sources of noise, or redundancies in the dataset? If so, please provide a description.*
  - No
10. *Is the dataset self-contained, or does it link to or otherwise rely on external resources (for example, websites, tweets, and other datasets)? If it links to or relies on external resources, a) are there guarantees that they will exist, and remain constant, over time; b) are there official archival versions of the complete dataset (that is, including the external resources as they existed at the time the dataset was created); c) are there any restrictions (for example, licenses, fees) associated with any of the external resources that might apply to a dataset consumer? Please provide descriptions of all external resources and any restrictions associated with them, as well as links or other access points, as appropriate.*
  - The data is self-contained.
11. *Does the dataset contain data that might be considered confidential (for example, data that is protected by legal privilege or by doctor-patient confidentiality, data that includes the content of individuals' non-public communications)? If so, please provide a description.*
  - No
12. *Does the dataset contain data that, if viewed directly, might be offensive, insulting, threatening, or might otherwise cause anxiety? If so, please describe why.*
  - No
13. *Does the dataset identify any sub-populations (for example, by age, gender)? If so, please describe how these subpopulations are identified and provide a description of their respective distributions within the dataset.*
  - No
14. *Is it possible to identify individuals (that is, one or more natural persons), either directly or indirectly (that is, in combination with other data) from the dataset? If so, please describe how.*
  - No
15. *Does the dataset contain data that might be considered sensitive in any way (for example, data that reveals race or ethnic origins, sexual orientations, religious beliefs, political opinions or union memberships, or locations; financial or health data; biometric or genetic data; forms of government identification, such as social security numbers; criminal history)? If so, please provide a description.*
  - No

16. *Any other comments?*

- NA

### Collection process

1. *How was the data associated with each instance acquired? Was the data directly observable (for example, raw text, movie ratings), reported by subjects (for example, survey responses), or indirectly inferred/derived from other data (for example, part-of-speech tags, model-based guesses for age or language)? If the data was reported by subjects or indirectly inferred/derived from other data, was the data validated/verified? If so, please describe how.*
  - The data was obtained by cleaning the raw data. The raw data was obtained from the WHO Mortality Database. The data was not reported by subjects or indirectly inferred/derived from other data.
2. *What mechanisms or procedures were used to collect the data (for example, hardware apparatuses or sensors, manual human curation, software programs, software APIs)? How were these mechanisms or procedures validated?*
  - The data was collected by downloading manually through the WHO Mortality database
3. *If the dataset is a sample from a larger set, what was the sampling strategy (for example, deterministic, probabilistic with specific sampling probabilities)?*
  - The dataset is a sample from a larger set as we use certain age groups given from the WHO database.
4. *Who was involved in the data collection process (for example, students, crowdworkers, contractors) and how were they compensated (for example, how much were crowdworkers paid)?*
  - Thu Dong was the only person involved in the data collection process.
5. *Over what timeframe was the data collected? Does this timeframe match the creation timeframe of the data associated with the instances (for example, recent crawl of old news articles)? If not, please describe the timeframe in which the data associated with the instances was created.*
  - The data was collected during April 2024. The raw data was only available from 2000 to 2019.
6. *Were any ethical review processes conducted (for example, by an institutional review board)? If so, please describe these review processes, including the outcomes, as well as a link or other access point to any supporting documentation.*
  - No ethical review process was conducted

7. *Did you collect the data from the individuals in question directly, or obtain it via third parties or other sources (for example, websites)?*
  - The data was directly downloaded from the WHO official website.
8. *Were the individuals in question notified about the data collection? If so, please describe (or show with screenshots or other information) how notice was provided, and provide a link or other access point to, or otherwise reproduce, the exact language of the notification itself.*
  - There was no direct involvement of individuals in obtaining the raw data.
9. *Did the individuals in question consent to the collection and use of their data? If so, please describe (or show with screenshots or other information) how consent was requested and provided, and provide a link or other access point to, or otherwise reproduce, the exact language to which the individuals consented.*
  - Data is available publicly. Therefore, there is no need for any approval.
10. *If consent was obtained, were the consenting individuals provided with a mechanism to revoke their consent in the future or for certain uses? If so, please provide a description, as well as a link or other access point to the mechanism (if appropriate).*
  - NA.
11. *Has an analysis of the potential impact of the dataset and its use on data subjects (for example, a data protection impact analysis) been conducted? If so, please provide a description of this analysis, including the outcomes, as well as a link or other access point to any supporting documentation.*
  - NA.
12. *Any other comments?*
  - NA

### **Preprocessing/cleaning/labeling**

1. *Was any preprocessing/cleaning/labeling of the data done (for example, discretization or bucketing, tokenization, part-of-speech tagging, SIFT feature extraction, removal of instances, processing of missing values)? If so, please provide a description. If not, you may skip the remaining questions in this section.*
  - Yes. Only selected needed columns from the website and merged data from different age groups and years.
2. *Was the “raw” data saved in addition to the preprocessed/cleaned/labeled data (for example, to support unanticipated future uses)? If so, please provide a link or other access point to the “raw” data.*

- NA
3. *Is the software that was used to preprocess/clean/label the data available? If so, please provide a link or other access point.*
    - NA
  4. *Any other comments?*
    - NA

## Uses

1. *Has the dataset been used for any tasks already? If so, please provide a description.*
  - It has been used to analyze top mortality causes in young adults and middle-aged adults in Switzerland by creating the Negative Binomial Model.
2. *Is there a repository that links to any or all papers or systems that use the dataset? If so, please provide a link or other access point.*
  - <https://github.com/thu2912/Top-mortality-causes-of-age-groups-in-Switzerland.git>
3. *What (other) tasks could the dataset be used for?*
  - One can use this dataset for other models such as simple regression.
4. *Is there anything about the composition of the dataset or the way it was collected and preprocessed/cleaned/labeled that might impact future uses? For example, is there anything that a dataset consumer might need to know to avoid uses that could result in unfair treatment of individuals or groups (for example, stereotyping, quality of service issues) or other risks or harms (for example, legal risks, financial harms)? If so, please provide a description. Is there anything a dataset consumer could do to mitigate these risks or harms?*
  - No.
5. *Are there tasks for which the dataset should not be used? If so, please provide a description.*
  - No.
6. *Any other comments?*
  - NA

## Distribution

1. *Will the dataset be distributed to third parties outside of the entity (for example, company, institution, organization) on behalf of which the dataset was created? If so, please provide a description.*

- No
2. *How will the dataset be distributed (for example, tarball on website, API, GitHub)? Does the dataset have a digital object identifier (DOI)?*
    - The dataset will be distributed on GitHub. It doesn't have a DOI.
  3. *When will the dataset be distributed?*
    - April 20, 2024
  4. *Will the dataset be distributed under a copyright or other intellectual property (IP) license, and/or under applicable terms of use (ToU)? If so, please describe this license and/ or ToU, and provide a link or other access point to, or otherwise reproduce, any relevant licensing terms or ToU, as well as any fees associated with these restrictions.*
    - No.
  5. *Have any third parties imposed IP-based or other restrictions on the data associated with the instances? If so, please describe these restrictions, and provide a link or other access point to, or otherwise reproduce, any relevant licensing terms, as well as any fees associated with these restrictions.*
    - No
  6. *Do any export controls or other regulatory restrictions apply to the dataset or individual instances? If so, please describe these restrictions, and provide a link or other access point to, or otherwise reproduce, any supporting documentation.*
    - No
  7. *Any other comments?*
    - NA

## Maintenance

1. *Who will be supporting/hosting/maintaining the dataset?*
  - Thu Dong
2. *How can the owner/curator/manager of the dataset be contacted (for example, email address)?* -thu.dong@mail.utoronto.ca
3. *Is there an erratum? If so, please provide a link or other access point.*
  - No
4. *Will the dataset be updated (for example, to correct labeling errors, add new instances, delete instances)? If so, please describe how often, by whom, and how updates will be communicated to dataset consumers (for example, mailing list, GitHub)?*

- Very likely it will not happen. In the case it does, it may happen once a year, and it will be communicated through GitHub
5. *If the dataset relates to people, are there applicable limits on the retention of the data associated with the instances (for example, were the individuals in question told that their data would be retained for a fixed period of time and then deleted)? If so, please describe these limits and explain how they will be enforced.*
    - No
  6. *Will older versions of the dataset continue to be supported/hosted/maintained? If so, please describe how. If not, please describe how its obsolescence will be communicated to dataset consumers.* -No the dataset is just updated. Although a history is available through GitHub.
  7. *If others want to extend/augment/build on/contribute to the dataset, is there a mechanism for them to do so? If so, please provide a description. Will these contributions be validated/verified? If so, please describe how. If not, why not? Is there a process for communicating/distributing these contributions to dataset consumers? If so, please provide a description.*
    - Pull request from Github.
  8. *Any other comments?*
    - NA
